BRENT OGDEN

FRONTEND ENGINEER

PROFESSIONAL SUMMARY

Frontend Engineer with 12+ years of expertise in HTML, JavaScript, and Bootstrap, renowned for driving innovation in user interface design and enhancing client satisfaction. Proficient in responsive design and React, consistently delivering outstanding frontend applications that surpass performance metrics. Passionate about leveraging Python for automation to boost team efficiency and productivity, effectively collaborating with cross-functional teams to streamline processes and significantly reduce execution times.

EMPLOYMENT HISTORY

OCT 2022 - NOV 2023

Senior Software Engineer, Dish Network, Littleton, Colorado

- Engineered Python ML app - utilizing OCR and language models to extract attributes from contracts and rename files to conform to naming conventions - enhancing legal department efficiency
- Spearheaded development of machine learning solutions for legal workflow automation, resulting in 40% higher user satisfaction rates and earning a Quarterly Innovation Award
- Automated contract management using Python to reduce team workload by 50%
- Boosted user satisfaction by 40% via CLM software modifications and enhancements
- Reduced project documentation development time by 8 hours
- Optimized back-end operations by enhancing layout and system configuration, improving system response time by 15%

DEC 2019 - SEP 2022

Configuration Analyst, Welltok/ Virginpulse, Denver, CO

- Revitalized 60+ marketing pages with modern aesthetics and code structure
- Worked directly with cross-functional teams (Service Delivery Managers, Business Analysts, Sales Team) to ensure project success and client satisfaction
- Analyzed redundancies and bottlenecks in the configuration workflow and identified opportunities for performance improvements using JQuery and Python scripting, decreasing lead times by 30%
- Authored system and technical documentation and built informative demos to aid adoption of new configuration methods
- Streamlined data integration processes using Python automation, boosting efficiency by 30%.
- Developed 20+ automation scripts to reducing project configuration delivery times by 25%.
- Implemented a streamlined communication process for 5 Business Analysts and 8 Service Delivery Managers, resulting in 50% reduction in response time and improved customer satisfaction.

• Became the specialist for our Airtable project management tool - established efficient processes/workflows and optimized prior ones - trained new and ongoing SDMS/BAs/etc. on how to leverage the tool

OCT 2018 - DEC 2019

Associate Configuration Analyst, Welltok, Denver, CO

- Implemented streamlined AirTable workflows, leading to a 20% decrease in data entry errors.
- Ensured client requirements were accurately captured and implemented by partnering with Business Analysts and Service Delivery Managers
- Developed and implemented various client program designs, including 100+ Jumbotrons, Promos, Marketing pages, Navigation items, and ActionCards for over 30 clients
- Enhanced 40+ client campaigns by streamlining asset setup, achieving 50% greater efficiency.

APR 2015 - DEC 2017

Web Developer, First Data Corporation, Greenwood Village, CO

- Took PSD files created by the Graphic Design team and used various web technologies including HTML5, Handlebars, PHP, and Adobe Experience Manager to build responsive, Bootstrap-based pixel perfect applications for 80+ financial services clients in all sectors of the business
- Developed 100s of websites in several languages playing a key role in working with the translation vendor to translate 30+ of these sites into country-specific versions
- Introduced innovative technologies such as Parallax animation, Handlebars.js and SCSS, boosting product value to the clients and improving team productivity
- Managed and enhanced existing website content and features in AEM and Wordpress

- Optimized web app performance, reducing load times by 30% through various code optimization and image compression tools
- Pioneered the use of CSS Grid layouts (Bootstrap) in projects, increasing layout flexibility and speed and ensuring mobile and desktop responsiveness and consistency
- Conducted thorough code reviews to ensure robustness and reliability of web applications.

MAR 2013 - APR 2015
Associate Web Program Manager, First Data Corporation, Greenwood Village, CO USA

- Configured, developed and integrated BoldChat, our live chat provider, across 100s of sites and served as the technical support resource
- Responsible for the administration and support of Brightcove, our video provider, to manage video content across 100s of sites
- Redesigned and administered SharePoint site for use by the Web Team
- Responsible for domain management - including purchasing domains, submitting DNS requests and expediting transfer of domains into centralized account
- One of two system admins for our project management tool - Workfront - developed new request forms for various teams within the organization to streamline processes and improve efficiencies
- Managed principal content for 100's of sites - utilizing Adobe Experience Manager

JUL 2011 - MAR 2013
Quality Assurance Lead, National Cinemedia, Greenwood Village, CO

- Led quality assurance for 7 websites, 2 mobile apps, and a SharePoint site
- Managed regression testing and maintenance of all consumer-facing platforms
- Coordinated with Project Management, Content Administration, and Interactive Development teams
- Led mobile QA efforts, ensuring reliable and bug-free performance on iOS and Android platforms.
- Enhanced communication with remote teams, boosting app functionality and user satisfaction.
- Managed crash reports and user feedback to prioritize continuous app improvement.
- Implemented automated testing tools, cutting down error rates by 30%.

EDUCATION

Bachelor's Degree, University of Colorado at Boulder, Boulder, CO

BS: Bachelor of Science Business Administration – Information Systems
